SUMMARY

A Frontend Developer specializes in creating the visual and interactive aspects of a website or web application. They use technologies such as HTML, CSS, and JavaScript to build user interfaces that are not only visually appealing but also functional and responsive across various devices. Frontend Developers work closely with UX/UI designers to implement design concepts and ensure a seamless user experience. Their role involves optimizing performance, improving user experience, and often integrating with backend services to create a cohesive and functional product.

SKILLS

- Problem Solving: Solve problems quickly and efficiently.
- Teamwork: Collaborate effectively with the software team.
- Communication Skills: Communicate design and technical requirements.
- Flexibility: Ability to quickly adapt to changes and learn new technologies.

WORK EXPERIENCE
